

MPPT Solar Charger & Controller 20Ah Free Maintenance

Feature:

- MPPT Controller can help do the max power point tracking for voltages & current.
- Solar panel can absorb more sunshine by its higher tracking point by MPPT, thus it can help to charge more electricity for gel batteries, and in this way, buyers can choose to buy with less wattages solar panel & with better efficiency. It can save a lot of extra cost.
- MPPT Control can also have function of intelligent control, and realize the free maintenance.
- All the parameters can be set during the production in the factory.
- MPPT can realize for some hours with full wattags & some hours with half wattages or 1/3 wattages to save the battery.
- MPPT can realize the lights to be turned on when sunset & turned off when sunrise with free maintenance.
